ONE RIVER **MANY VOICES**

Episode 2: The Story of the Superfund

"It's a Superfund Site," they say. But what's that mean, really? Who's involved? How does it work? How long is the process? What does "finished" even mean? We straighten out the PRPs from the EPAs – with a dash of CERCLA tossed in.

In this episode, you will hear about legacy contamination, squeaky clean versus risk reduction, the general role of Potentially Responsible Parties, and new research to tackle old problems.
